Web Application Developer (#WD-02-19)

Exciting opportunity for a full-time ASP and .NET Web Developer to maintain dynamic websites and develop web database applications to support DoD client whose site is transitioning to the AWS GOVCLOUD. Looking for candidate who can analyze the problem, engineer the solution, and work individually and with a team to provide secure internet tools for our clients.

All applicants should have:
- Strong .NET / ASP, VBscript, Javascript skills.
- Sound experience in querying and managing MS SQL servers and creating /modifying stored procedures.
- Good client and communication skills for interface with customers
- Ability to work both independently and collaboratively; must be a self-starter but work well in team settings.
- Ability to handle multiple projects as necessary.
- US Citizenship Required

Other desirable skills:
- Security Clearance or the ability to get a security clearance
- CompTIA Security + or CISCO CCNA Security certification (accreditation required within 45 days after start)
- Experience with managing MS IIS Web server with knowledge of TLS encryption architecture and PKI certificate management a plus.

Please reference position # **WD-02-19** and indicate salary requirements in cover letter or email summary.
